

Introduction

- Macros to extract Test Results (L. Demaria presentation last meeting): a working version has been circulated and it is on web

www.to.infn.it/~demaria/Test-ana/Test-ana.html

These macros read .root files generated by HybridDialog in CMS sw package and produce summary plots and report file.

You are strongly encouraged to use these macros and give feedback !!!!!

Each testing center has to prepare a **web page** containing:

Short description of DUT

Output of the macros

Root files

Remarks & Comments

- The same procedure should be followed also for hybrid qualification with ARC
(prepare a **web page** as mentioned, with ARC output files etc.)
- Module Test SW Team should provide as soon as possible equivalent analysis tools to evaluate the working status of hybrid or module
- It is a **MUST** to
 - keep track of what is going on in every home lab
 - verify quality of resultsSend me the link to your pages and I will put them in the MTWG homepage

Feedback

- Feedback from users is very important: please if you find problems, bugs, etc please report it to the community !
